The PAJR is an international, open access, online, peer-reviewed journal. It has a distinguished international board and reviewers. Being the only subspecialized regional rhinology journal in the Arab Countries and Middle East, authors from all over the world are encouraged to submit their up-to-date work.

The PAJR is a forum to allow clinicians and researchers to exchange trending ideas in rhinology targeting best clinical patients care.

It considers technical and clinical studies related to health, ethical, and social issues in the field of rhinology. It supports both basic and clinical research development in diagnosis and treatment of rhinological diseases and also the publishing of research articles, reviews, clinical trials, and case reports.

The main topics of interest include acute and chronic rhinosinusitis; allergic and nonallergic rhinitis; snoring and sleep apnea; olfactory and taste diseases; paranasal sinus tumors; sinonasal surgeries; and facial plastic and reconstructive surgery.

In the current issue, many important issues that are raising the interest of rhinologists all over the world are presented. This includes strategy of endoscopic skull base reconstruction in endoscopic trans-sphenoidal approaches depending on the grade of intraoperative cerebrospinal fluid (CSF) leak according to size of arachnoid defect [1]; pathogenesis of chronic rhinosinusitis (CRS) and phenotyping [2,3]; anosmia and corona virus infection disease 2019 (COVID-19) patients [4]; mandibular fractures in children [5]; intranasal splint removal [6] and more.

The updated discussion of these topics offers an excellent opportunity for researchers to provide better patient care.

Amongst the current international turbulence of the sequential waves of the COVID-19 pandemic, the 13th Pan Arab Rhinology Society Conference will be held in association with the Jordanian Otorhinolaryngology Conference in Oman, on June 8–10, 2022.

Welcome to the 13th PARS 2022 Conference and we, the PAJR editorial board, are looking forward to your distinguished scientific participation.
